

An interdisciplinary summer school on mining of biological data for master and PhD students

August 2019, Minsk, Belarus

	Saturday 10.	Sunday 11.	Monday 12.	Tuesday 13.	Wednesday 14.	Thursday 15.	Friday 16.	Saturday 17.	
Time			Course	Course	Course	Course	Course	Mini-workshop	
			Taxi leaves at 7:45	Taxi leaves at 08:00	Taxi leaves at 08:00	Taxi leaves at 08:00	Taxi leaves at 08:00	Taxi leaves at 08:00	
8:15-8:30			Introduction						
8:30-9:15	Arrival and check in at the hotel, dinner	Social program whole day: Tour to the Castles of Mir and Nesvizh. Lunch will be served	Orange Introduction (Dr. Marko Toplak University of Ljubljana and SMIS Beam-line Synchrotron Soleil)	Invited lecture: Peter Nazarov, Luxembourg Institute of Health, Department of Oncology Single Cell transcriptomics	Orange Introduction (Dr. Marko Toplak)	Invited lecture 1: Dr. Ferenc Borondics, SMIS Beam-line Synchrotron Soleil, Paris, France Big facilities, big data	Invited lecture: Dr. Christoph Sandt, SMIS Beam-line Synchrotron Soleil, Paris, France Challenges in data analysis of infrared spectra from biological and biomedical samples	Invited lecture: Prof. Dr. Boris Mizaikoff, University of Ulm, Germany IR Sensor Technologies for Biomedical Applications	
09:15-10:00			Module 3: Spectroscopic methods (Olga)	Module 4: Analytical methods used in biology (Olga)	Module 5: Biomedical Imaging (Vassili)	Group work (Experts in a Team)	Group work (Experts in a Team)	Workshop with research presentations by PhD students	
10:00-10:15			Break						
10:15-10:45			Module 6: Basic Statistics (Victor)	Module 9: Machine learning (Roman)	Module 12: Data pre- treatment (Achim)	Group work (Experts in a Team)	Group work (Experts in a Team)	Workshop with research presentations by PhD students	
10:45-12:00			Tutorial: Basic statistics (Victor)	Tutorial: Machine learning (Roman)	Tutorial: Data pre- treatment (Achim)				
12-13			Lunch						
13:00-13:30			Module 7: PCA (Achim)	Module 10: Deep learning (Vassili) Room: U227	Tutorial for modules 6- 12, further Data Analysis and Orange Rooms: U223 and U226 Topics for group work will be distributed together with the data		Group work (Experts in a Team)	Group work presentations	Workshop with research presentations by PhD students
13:30-14:45			Tutorial: PCA (Achim)	Tutorial: Deep learning (Vassili)					
14:45-15:00			Break						
15:00-15:30			Module 8: Clustering (Petr)	Module 11: Data analysis of genetic data (Vasily)					
15:30-16:45			Tutorial: Clustering (Petr)	Tutorial: Data analysis of genetic data (Vasily)					
Evening			Claustrophobia Escape rooms	Alivaria museum	Volley ball/soccer and barbecue	Free	Free	Workshop dinner	

All lecture rooms are in the faculty of International Relations.
